

Post Implementation Evaluation Report

Registration, Enforcement and Compliance System (RECS) – FilePro to Oracle – Agriculture

Project Dates: 10/2001 through 9/2004

Project Cost: \$1,012,572

Project Objectives

This project brought a number of FilePro application modules into the Oracle RECS environment. The system replaced the older FilePro systems. A single consolidated system was developed, which extended current functionality and requires only a single point of entry. Both client server and web browser users are supported.
