

# Post Implementation Evaluation Report

## Replacement Food Service Replacement – Kansas State University

Project Dates: 8/2005 through 8/2007

Project Cost: \$483,459

### Project Objectives

#### **Project Objectives**

The objectives of this project are to:

- The system will automate business processes, such as:
  - Food Stores will be able to submit orders electronically to food suppliers, eliminating hand entering of orders, invoices, and other data through the purchasing, receiving, and payment process.
  - Food Stores will be able to send invoices electronically to accounts payable (Pittman and the University).
  - Individual Dining Centers will be able to sending food requisitions electronically to central Food Stores.
  - Food Stores will be able to communicate electronically to Pittman office personnel the information they need to process dining center account debits for the food sent from Food Stores to the Dining Centers. There should not be any hand entering of data.
  - Interfaces will be built to/from the new system to other K-State systems to reduce/eliminate manual entry of data.
- The system will provide users with real-time view and update access to data.
- The system and reports will be configured to meet the needs of users.
- The system will support an academic/classroom environment for student learning.
- The system will conform to K-State IT architecture standards.
