

Post Implementation Evaluation Report

Vital Statistics Integrated Information System – Health and Environment

Project Dates: 1/2001 through 2/2006

Project Cost: \$3,139,948

Project Objectives

- Replace the existing legacy system and extend application functionality in key functional areas including:
 - Point of Sale
 - Web enabled entry of Vital events
 - Faster more efficient registration and issuance of Vital event certificates and the issuance of abstract certificates
 - Greater security and fraud prevention abilities
 - Improved workflow and record keeping
- Provide a secure web interface for both the entry and access to vital record data for hospitals, funeral homes, courts, states, etc.
- Consolidate all legacy data into one central technology
- Expand the amount of detailed data managed by the system
