

## **Post Implementation Evaluation Report**

### **Fabric Switch Replacement – Transportation**

Project Dates: 5/2007 through 11/2007

Project Cost: \$239,000

#### Project Objectives

- Replace equipment that has reached the end of its life cycle.
- Improve the efficiency and capacity of the data paths to SAN storage.
- Upgrade to newer Fabre Channel technology with increased redundancy.
- Increase the throughput capacity of the fiber optic communications links to the SAN
- Assure that electronic data can be stored and retrieved efficiently as the SAN storage systems requirements expand in the future.
